TRADE WITHOUT THE NOISE.   FOLLOW THE DATA.

CONTROL THE RISK.

THE TERMINAL WITHOUT PRICES OR CANDLESTICKS

[WHO WE ARE]

We're rewriting the rules of trading

We're not another trading startup. We're a crew of ex-fund managers, dealing desk insiders and algorithmic developers with cumulative 50 years of experience in trading.

We've:

|	
Managed millions in capital	[01]
Written code that crunches millions of market scenarios	[02]
Logged tens of thousands of real trades	[03]
Collected exclusive trader data no retail user has ever seen	[04]

EMAMA TERMINAL ISN'T JUST A TOOL. IT'S YOUR WAY OUT OF THE CHAOS

[THE PROBLEM]

# The game has changed, most traders approach to trading haven't

Algorithms run the markets now. Market makers profit off your predictability.

Why?

Because everyone's doing the same thing: the same Pattern Algorithms in Trading, the same stop-loss placements, the same emotional mistakes.

Market makers know exactly where you'll flinch. That's why 9 out of 10 traders lose.

You spend hours analyzing — the market still beats you to the punch.
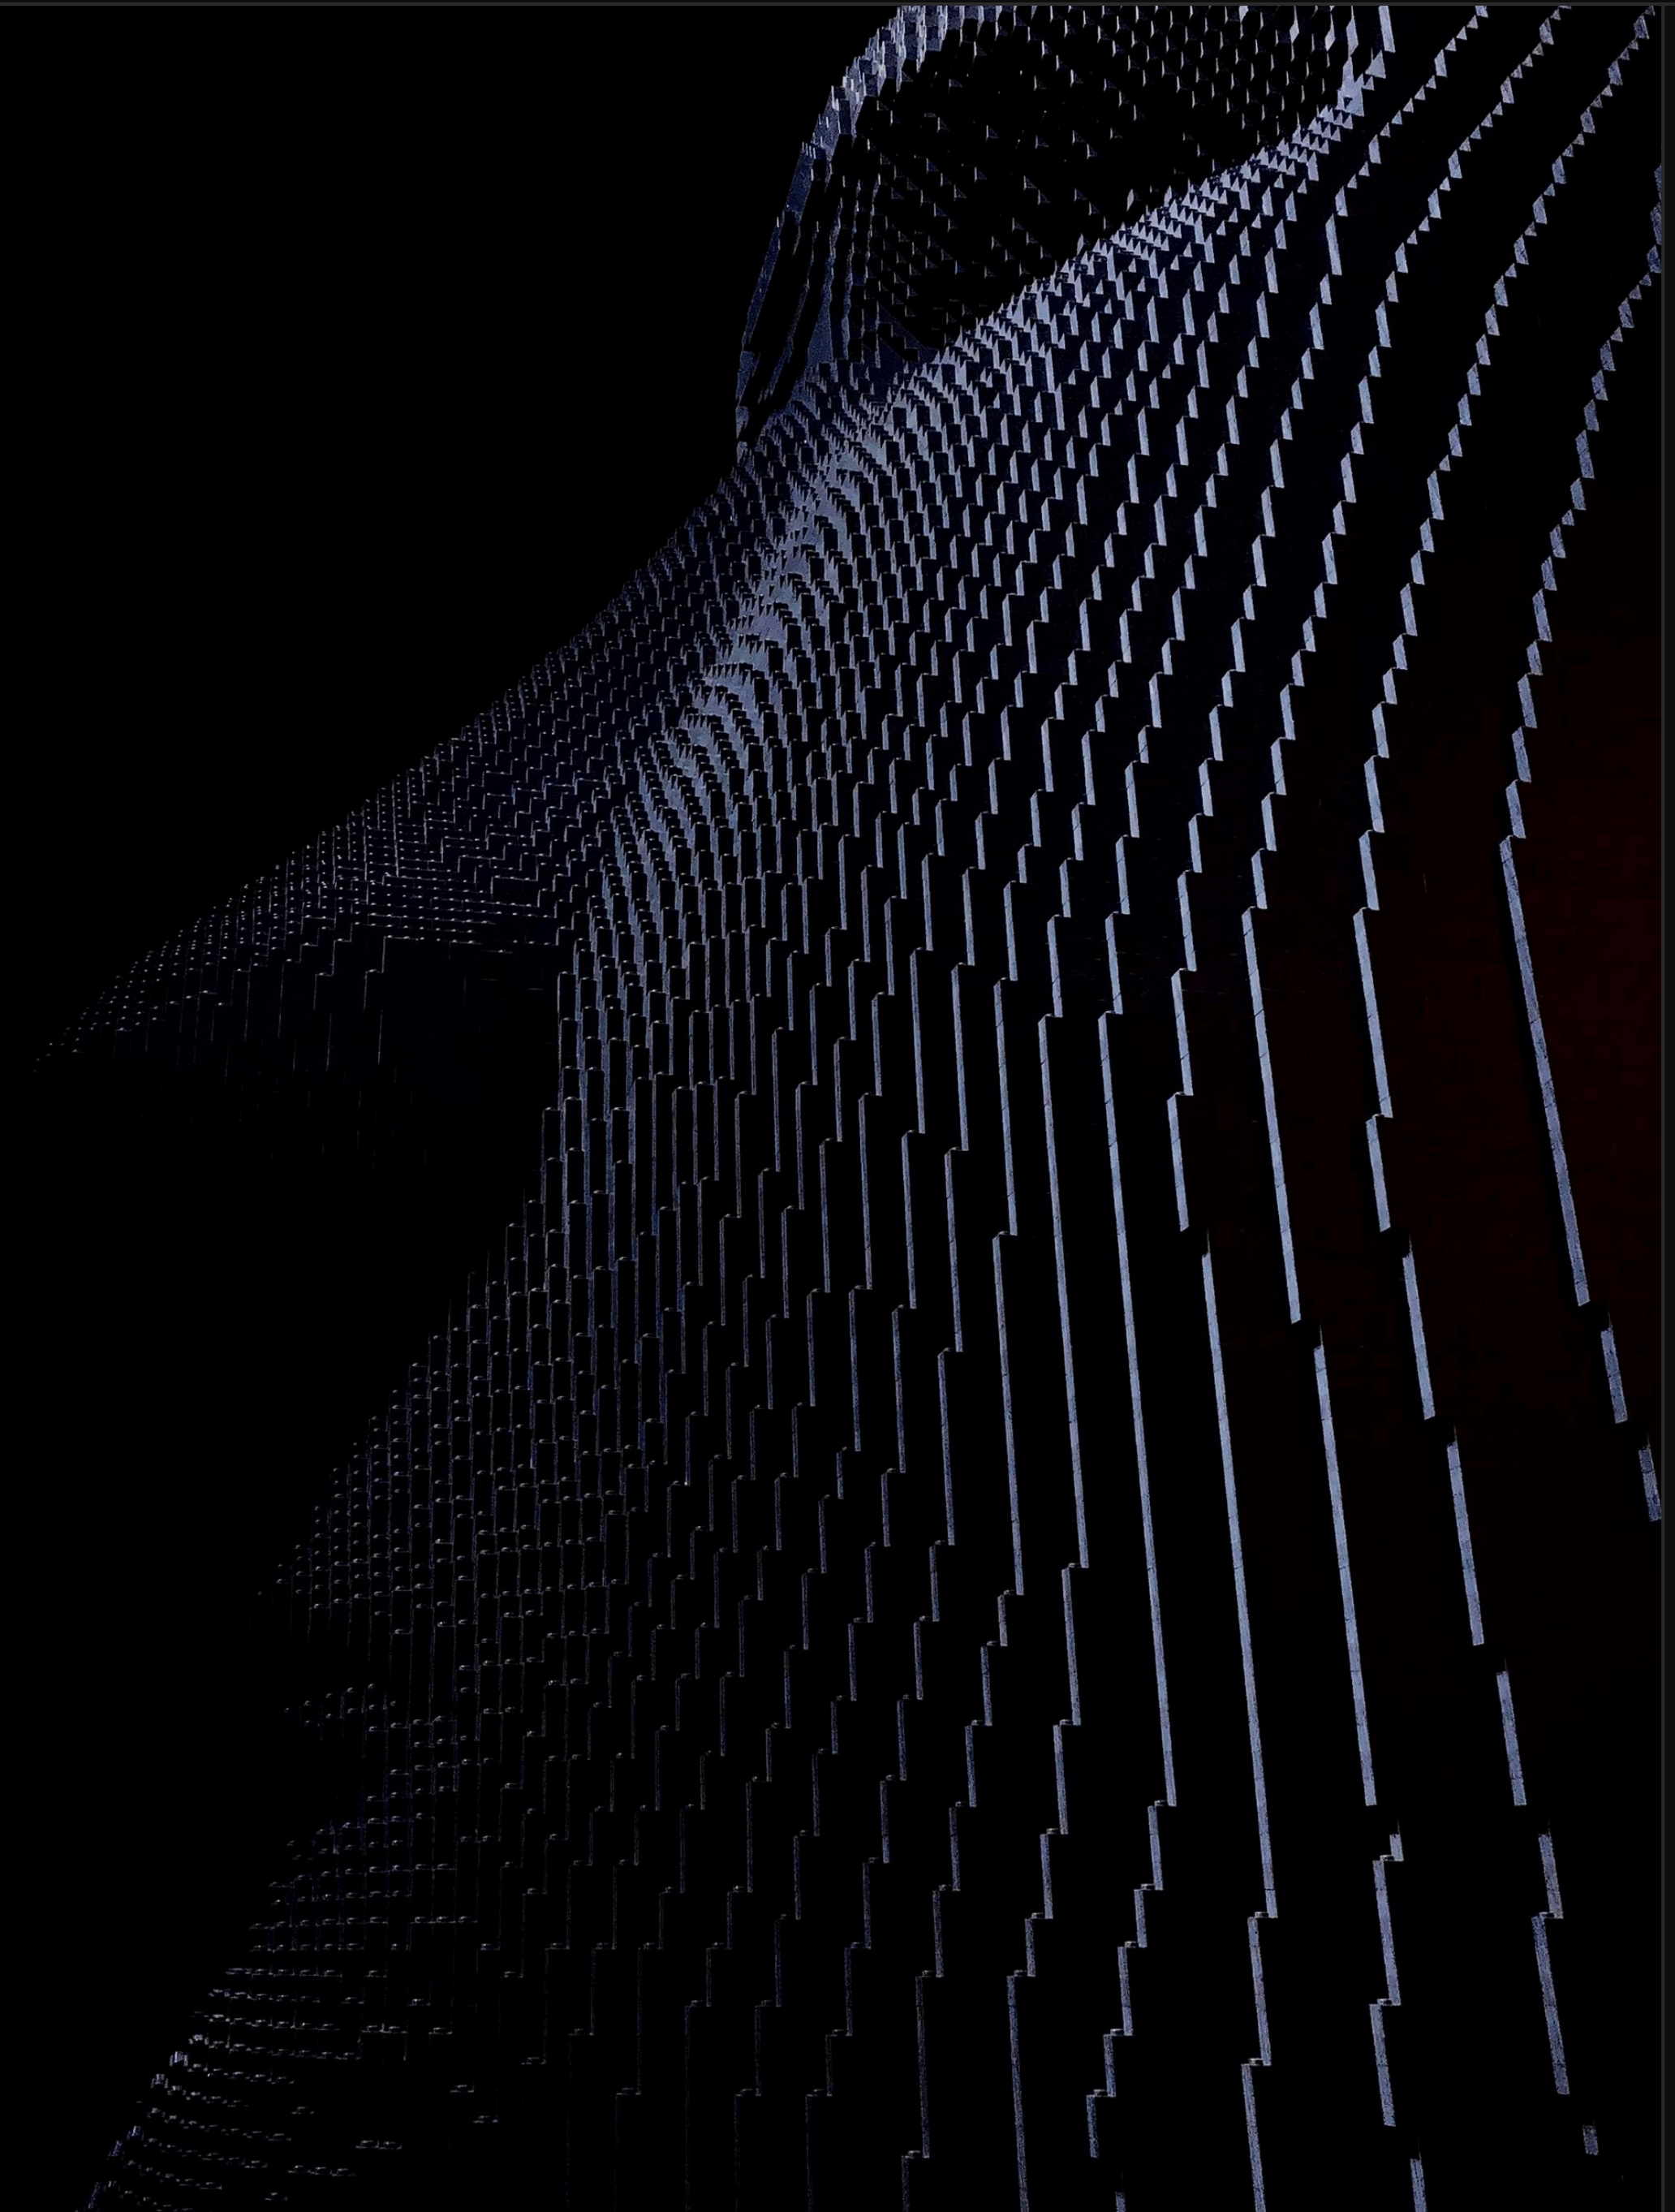

[THE SOLUTION]

EMAMA — trade like you've got the playbook
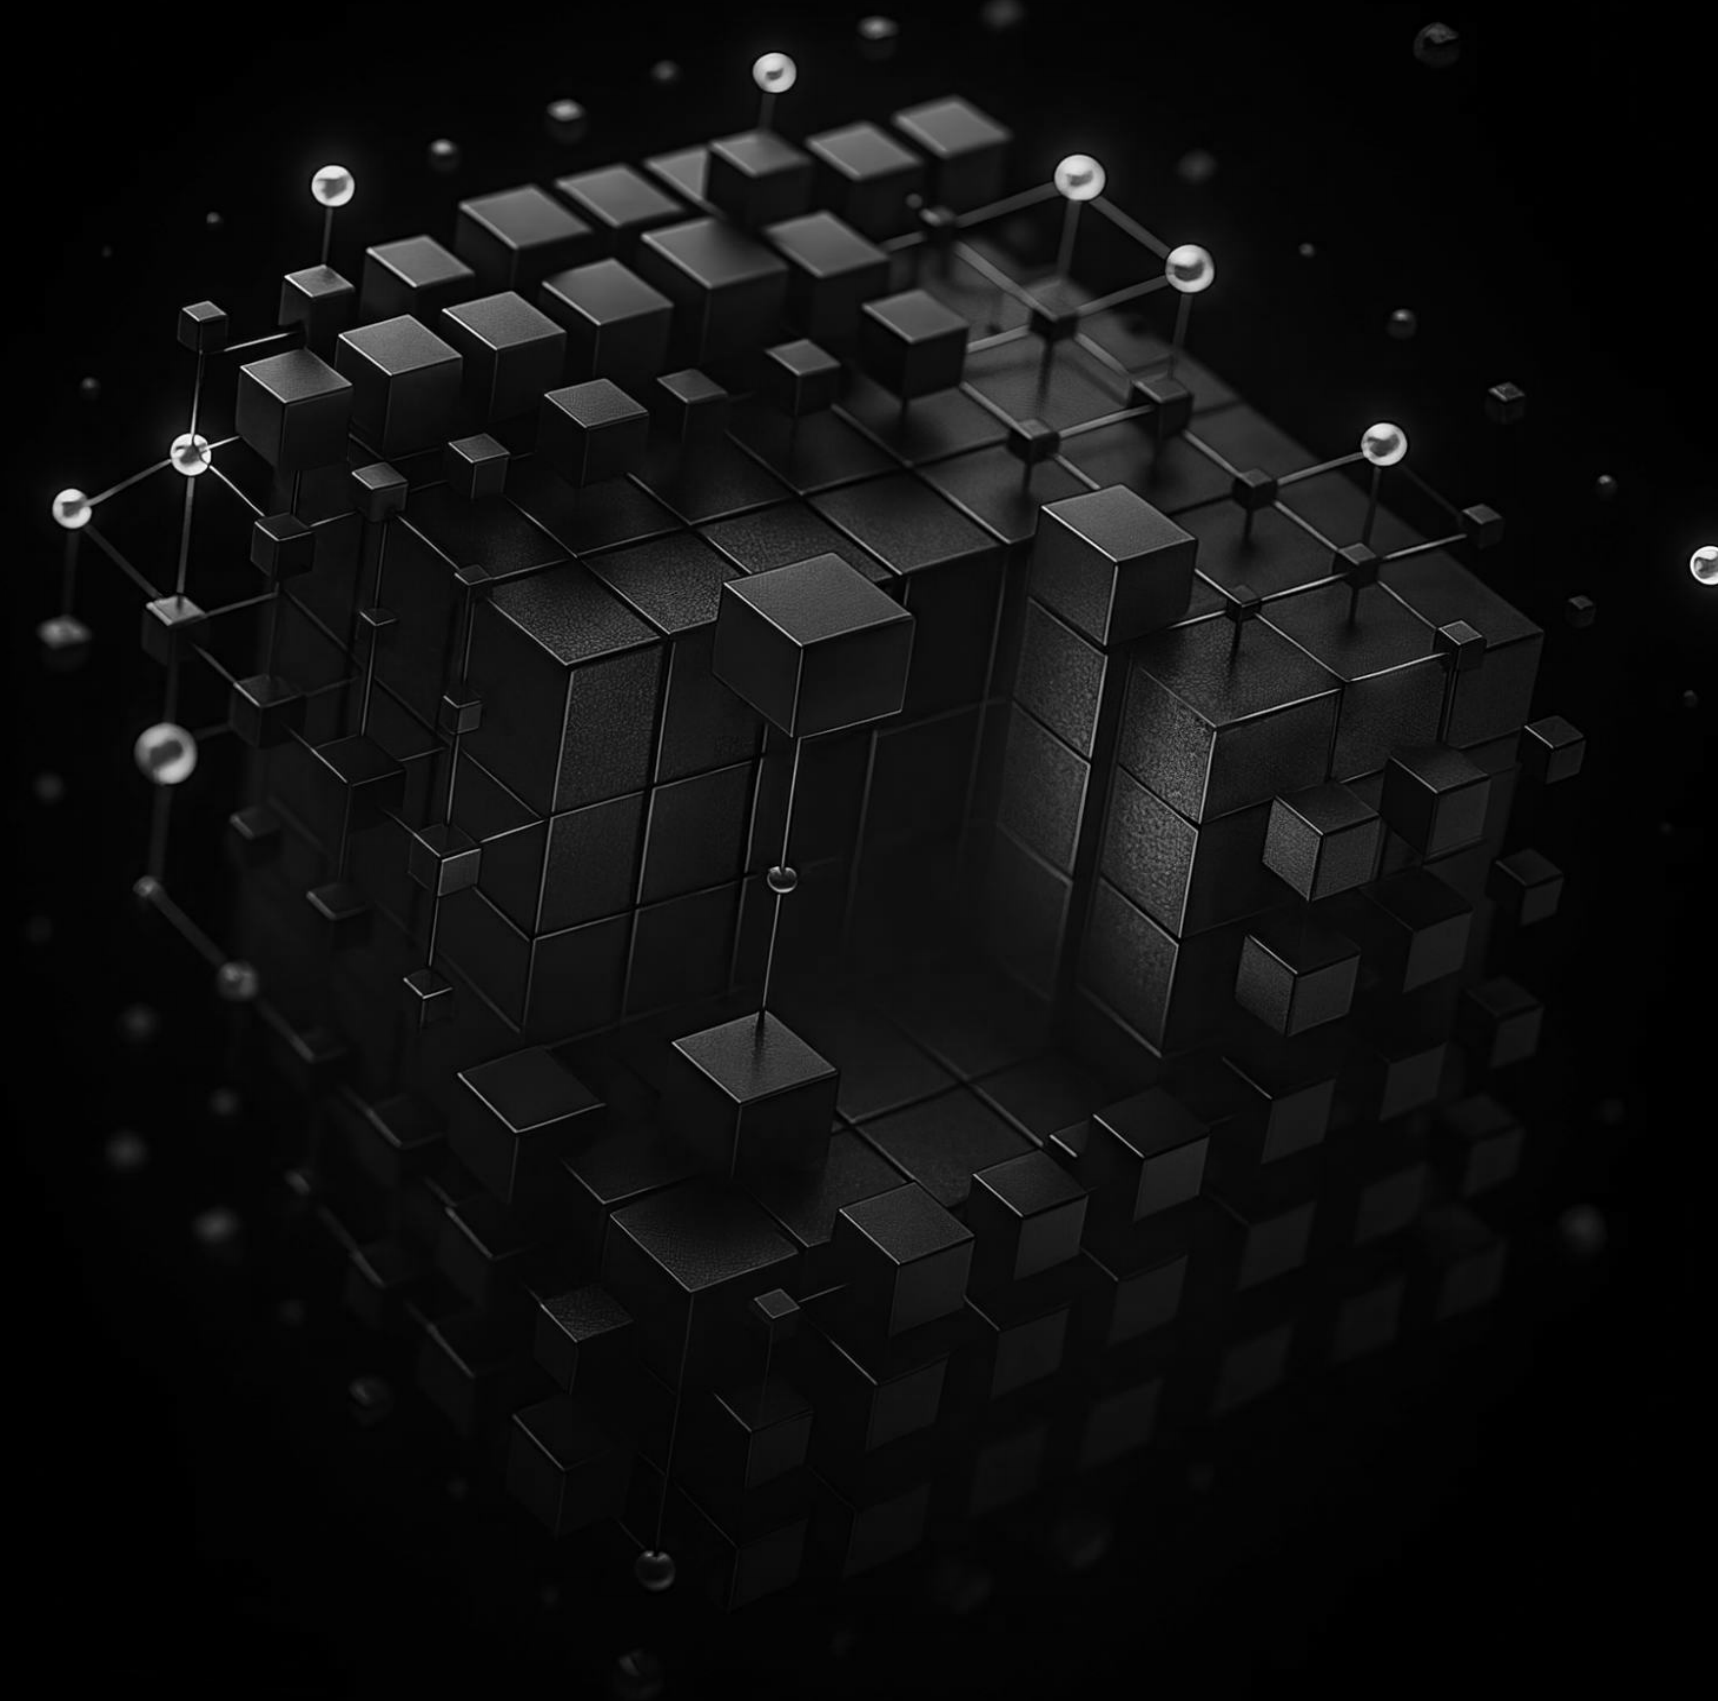

We threw out all the distractions:

**NO
PRICES**

**NO
CANDLESTICKS**

**NO
TECHNICAL ANALYSYS**

Instead, EMAMA runs on Exponential Moving Average (EMA) 25 + the behavior of big capital.

Add in multi-timeframe analysis, automated risk controls, and zero emotional interference — and you've got a statistical edge no market maker wants you to have.

"THERE'S NO PLACE HERE FOR CHART PATTERNS, SUPPORTS, NEWS, OR CANDLE FANTASIES"
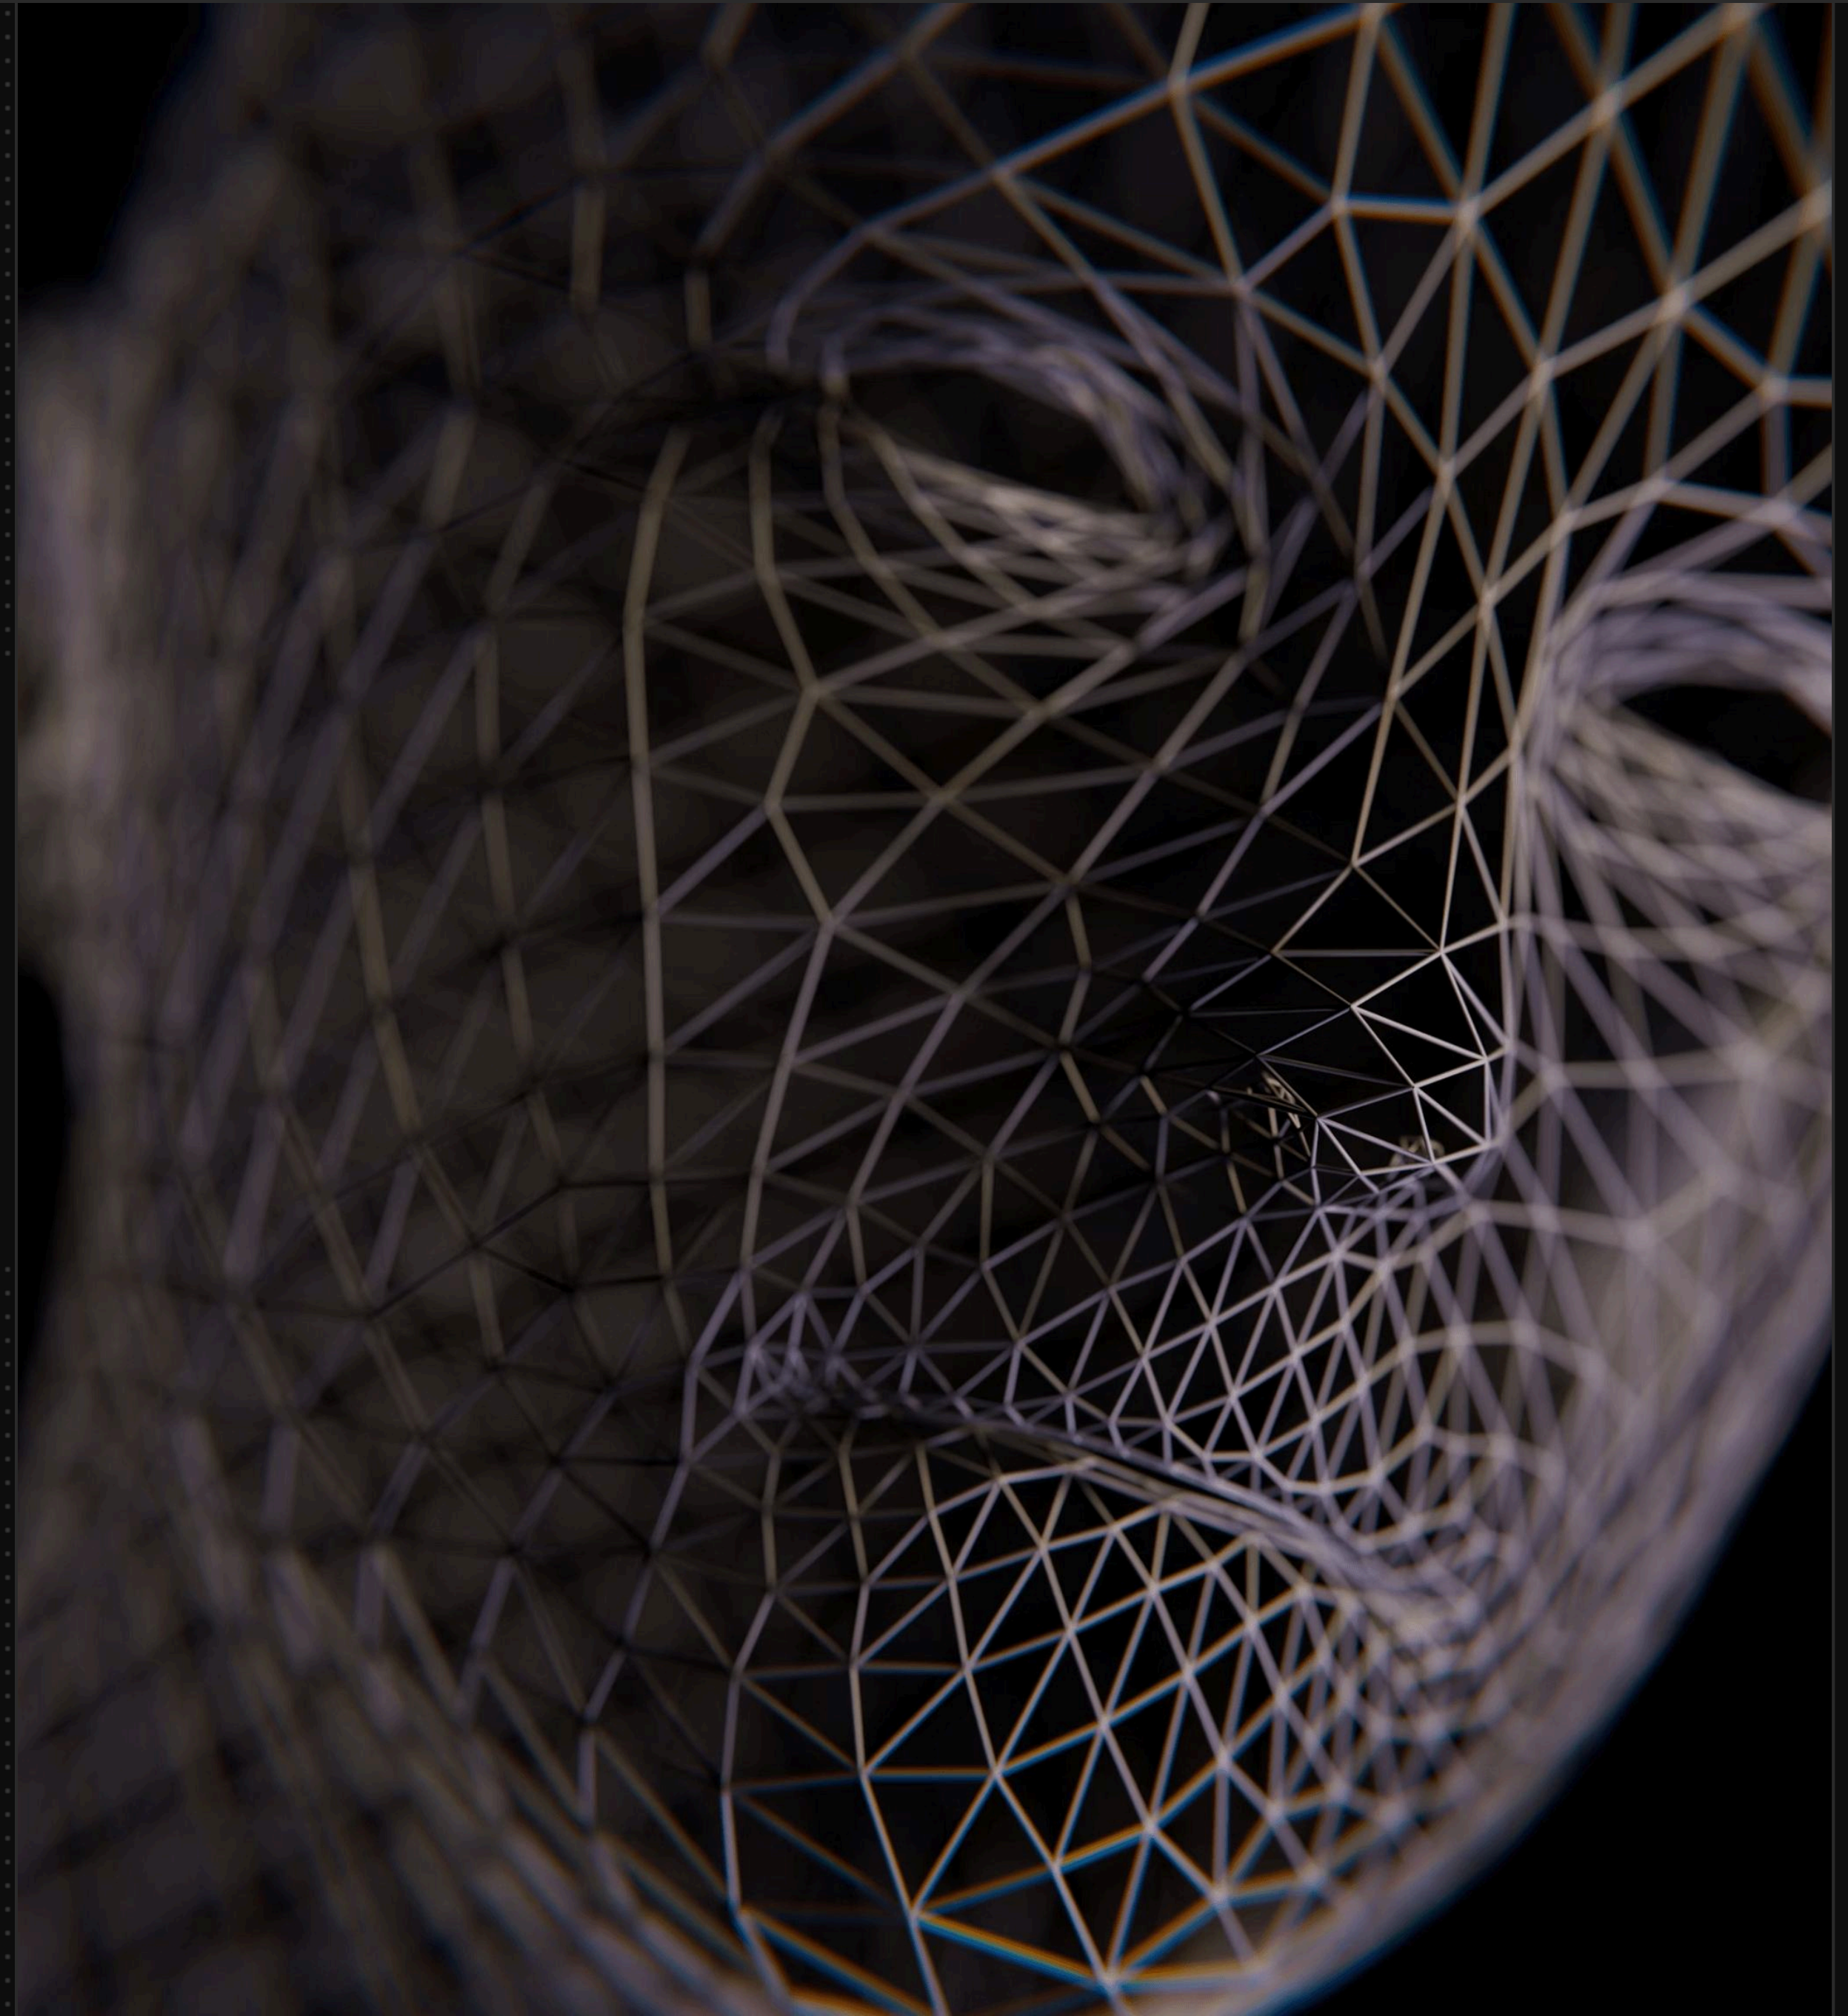

© EMAMA CEO

[WHY EMA 25 WORKS]

We tested over 100 Million market scenarios

AI tests confirmed it: EMA 25 is the pivot point market makers use to move liquidity.

It's not theory. It's math.

It's the equilibrium of the market and if you know it, you see the game in real time.
